EXECUTIVE SUMMARY

Skilled in full-stack web development and database management, I bring strong problem-solving and algorithmic abilities with a proven track record in hackathons. The role requires proficiency in building scalable web platforms, integrating modern frameworks, and engineering secure backend architectures, which align well with my experience in MERN stack development. I am confident I'm a strong fit for this position and eager to contribute effectively.

EDUCATION

Bachelor of Engineering (B.E) in Computer Science and Engineering **2026 - Present**

Kamaraj College of Engineering and Technology | **CGPA:** 9.1 / 91% (Till 5th Semester)

Higher Secondary Certificate (HSC) **2022**

Oxford Matriculation Higher Secondary School | **Percentage:** 92%

Secondary School Leaving Certificate (SSLC) **2020**

Shri Ramana Vikaas Higher Secondary School | **Percentage:** 93%

TECHNICAL SKILLS

- **Programming Languages:** TypeScript, JavaScript, Java, Python, C
- **Tools & Software:** VS Code, GitHub, Git, Figma, Colab
- **Technologies & Frameworks:** React.js, Next.js, Node.js, Express.js, Tailwind CSS, Bootstrap, GSAP, Java Springboot
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Core Concepts:** DBMS, OOP, DSA

SOFT SKILLS

- Problem Solving & Analytical Thinking
- Teamwork & Collaboration
- Time Management
- Adaptability & Continuous Learning

PROFESSIONAL EXPERIENCE

Cognifyz **January 2026**

Role: MERN Stack Developer Intern

Collaborated with a remote engineering team to design, build, and debug dynamic web components using the MERN stack. Applied responsive design practices and state management workflows to optimize production-ready interface features. Successfully delivered all assigned development milestones within a 1-month timeline, significantly improving web application performance.

Role: *MERN Stack Intern*

Executed a comprehensive frontend design and systems integration project during an intensive 20-day full-stack engineering internship. Utilized modern CSS frameworks and JavaScript libraries to build highly interactive, user-centric interfaces and API connections. Partnered closely with senior mentors to hit tight release sprints, resulting in enhanced interface rendering efficiency.

PROJECTS

Food Bridge**github.com/pranitha080511/Food-Bridge**

Engineered an AI-based food donation platform designed to connect active food donors, NGOs, and community volunteers seamlessly. Integrated intelligent features including live map tracking, distance calculation, food freshness detection logic, and user rating systems. Successfully built an interactive interface that optimizes distribution efficiency and encourages localized community feedback.

Tribal Earth 360**tribal-earth-360.vercel.app**

Developed an AI-driven web platform designed to simplify the Forest Rights Act (FRA) Patta claim application and management ecosystem. Integrated automated AI modules to digitize historical legacy records and evaluate claimant data for government welfare eligibility. Successfully built a localized digital interface that directly streamlined administrative tracking and support for tribal beneficiaries.

PatientX**patient-x.vercel.app**

Designed and deployed a secure healthcare data marketplace allowing patients to safely monetize their medical records for research purposes. Implemented blockchain-based access control and smart contracts to enforce transparent user permissions and secure data sharing. Created an AI-based valuation mechanism to accurately assess data assets while guaranteeing 100% data transparency.

AWARDS & ACCOMPLISHMENTS

- Runner-up, AI Hackathon – Organized by SRM College, Madurai (Project: PatientX)
- 3rd Prize, Project Expo – Organized by Anna University Regional Campus, Madurai (Project: Tribal Earth 360)
- Top 20 Position, VibeHacks 2.0 Hackathon – Organized by Loveable AI
- Finalist, Gyan Mitra 26 Hackathon – Conducted by MEPCO College
- Recipient, Oracle Job Readiness Certification – Completed a 20-day program under Team Everest for Girls with a stipend and kit
