EXECUTIVE SUMMARY

I'm a full-stack developer who thrives on solving tough problems—a skill I've sharpened by building scalable web platforms and competing in fast-paced hackathons. I specialize in engineering secure backends, which maps perfectly to what you're looking for. I'm confident I can hit the ground running and make a real impact on your team.

EDUCATION

Bachelor of Engineering (B.E) in Computer Science and Engineering **2026 - Present**

Kamaraj College of Engineering and Technology | **CGPA:** 9.1 / 91% (Till 5th Semester)

Higher Secondary Certificate (HSC) **2022**

Oxford Matriculation Higher Secondary School | **Percentage:** 92%

Secondary School Leaving Certificate (SSLC) **2020**

Shri Ramana Vikaas Higher Secondary School | **Percentage:** 93%

TECHNICAL SKILLS

- **Programming Languages:** TypeScript, JavaScript, Java, Python, C
- **Tools & Software:** VS Code, GitHub, Git, Figma, Colab
- **Technologies & Frameworks:** React.js, Next.js, Node.js, Express.js, Tailwind CSS, Bootstrap, GSAP, Java Springboot
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Core Concepts:** DBMS, OOP, DSA

SOFT SKILLS

- Problem Solving & Analytical Thinking
- Teamwork & Collaboration
- Time Management
- Adaptability & Continuous Learning

PROFESSIONAL EXPERIENCE

Cognifyz

January 2026

Role: MERN Stack Developer Intern

Teamed up with a remote engineering crew to build and debug dynamic MERN stack web components. I focused on responsive design and smooth state management to keep the UI running flawlessly. We pushed all features to production on a tight 1-month timeline, noticeably boosting the app's overall speed and performance.

Role: *MERN Stack Intern*

Built and integrated front-end features during an intensive 20-day full-stack internship. Used modern CSS frameworks and JavaScript to create highly interactive, user-friendly UI and seamless API connections. Worked closely with senior mentors to hit tight sprint deadlines, ultimately speeding up the app's rendering and page-load times.

PROJECTS

Food Bridge

github.com/pranitha080511/Food-Bridge

Built an AI-driven food donation platform that connects donors, NGOs, and volunteers in real time. Implemented live map tracking, distance calculations, a user rating system, and custom logic to detect food freshness. The interactive platform streamlines the donation logistics and builds trust through localized community feedback.

Tribal Earth 360

tribal-earth-360.vercel.app

Built an AI-driven web platform to simplify the Forest Rights Act (FRA) Patta claim and application process. Integrated AI modules to digitize legacy paper records and automatically check claimant data against government welfare eligibility rules. Developed a localized, user-friendly interface that streamlined administrative tracking and improved support for tribal beneficiaries.

Patient X

patient-x.vercel.app

Designed and deployed a secure healthcare data marketplace that allows patients to safely share and monetize their medical records for research. Implemented blockchain-based access control and smart contracts to enforce transparent user permissions. Developed an AI-driven valuation engine to fairly price data assets while maintaining absolute data integrity and auditability.

AWARDS & ACCOMPLISHMENTS

- Runner-up, AI Hackathon – Organized by SRM College, Madurai (Project: Patient X)
- 3rd Prize, Project Expo – Organized by Anna University Regional Campus, Madurai (Project: Tribal Earth 360)
- Top 20 Position, Vibe Hacks 2.0 Hackathon – Organized by Loveable AI
- Finalist, Gyan Mitra 26 Hackathon – Conducted by MEPCO College
- Recipient, Oracle Job Readiness Certification – Completed a 20-day program under Team Everest for Girls with a stipend and kit
- Published and presented a peer-reviewed research paper at an international conference, featured in the *International Research Journal of Advanced Engineering and Management*.
